EXPERIENCE

Founder & Product Designer, No Worry Tingxie

Oct 2024 - PRESENT, Singapore · Self-employed

Designed, built and launched No Worry Tingxie (iOS & web), a Chinese vocabulary tool starting with Singapore primary schools, used weekly by families preparing for school spelling tests.

- Validated demand with a web beta, then ran market research and 7 parent interviews that set the vision and a roadmap through Q2 2027
- Went native to close the independent-study loop: handwriting tests by finger or Apple Pencil, instant feedback and revision
- Built a token-based design system with separate Pinyin and Hanzi type ramps, live across iOS and web
- Earlier launched Pikabook (iOS), an AI study companion that turns book pages into learning material

Principal Designer, Autodesk

Feb 2023 - Jun 2024, Singapore

- Early core contributor to the master API platform initiative — the experience for product, version and API management across internal teams
- Aligned API, product and engineering teams around clear user journeys; led research with IT managers for Autodesk Access
- Mentored designers, UX writers and researchers through critiques and research reviews

Design Manager, ViSenze

Mar 2021 - Jul 2022, Singapore

Led the design function and a team of three for Discovery Suite, a computer-vision and ML product-discovery platform for retailers such as Zalora.

- Partnered with sales, marketing, product and engineering on the shift to product-led growth; ran the company's first design sprint
- Owned the UX for recommendation customization — three rounds of testing reframed a rule-based UI around merchandiser intent. Clients reported up to **+15% average order value**
- Shipped self-serve onboarding across five commerce platforms; started the team's component library

Freelance Product Designer & Researcher

2021 - 2024, Singapore

Short engagements with clients including BCG X, Telus and startups via Toptal — e.g. healthcare flows for Mandai × SingHealth (BCG X) and future-of-TV research for the Canadian market (Telus).

Senior UX Designer, Singtel

Jan 2020 - Dec 2020, Singapore

Led user experience of Singtel Rewards on the My Singtel app and singtel.com, and UX for OnePass, modernising a legacy login journey. Ran workshops to clarify unknowns and mentored three junior designers.

Senior UX Designer, Autodesk

Nov 2014 - Jul 2018, Singapore

Owned UX for Forge, Autodesk's cloud platform for developers to learn, try, buy and use 3D APIs — from launch.

- Designed app management, the developer learning journey, and monetisation (pricing, subscription, usage)
- Coordinated the pricing launch with a design team in Tel Aviv and marketing in the US
- Planned and ran quarterly user research; built Forge's design language and UI library with the branding team

Experience Designer (AVP), OCBC

Jan 2014 - Oct 2014, Singapore

Led design for ocbc.com and created the UX design guideline for OCBC digital services. Optimised the OCBC Wealth iPad flow for relationship managers.

User Experience Designer, Comcast Silicon Valley Innovation Center

Dec 2011 - Jun 2013, Sunnyvale, CA, USA

Led research, UX flow and visual design for XFINITY Connect email, voice and text. Ran remote research with 58 users to redesign email for a largely senior audience.

TEACHING & WORKSHOPS

- UX instructor, General Assembly (Mobile UX)
- Design-thinking workshops for the Singapore Tourism Board (with Korean travel agencies) and A*STAR
