Kim Eun Kyung

eunkyung.ek.kim@gmail.com | +65.9875.6023

Product and UX design leader with 10+ years of experience across enterprise platforms, fintech, B2B SaaS, and digital service journeys. Skilled in structuring ambiguous problem spaces, aligning senior stakeholders, leading design teams, and translating research, data, and business needs into scalable product experiences. Experienced in design systems, complex workflows, executive design reviews, and end-to-end delivery from UX strategy to detailed design execution.

JOB EXPERIENCE

Pikabook l No worry Tingxie — Founder / Product & UX Lead

2024 – Present

- Founded and led the end-to-end design and launch of AI-enabled learning products that transform physical learning materials into interactive digital experiences.
- Conducted user research with parents and learners, mapped learning workflows, and identified key pain points around language practice, pronunciation, and weekly test preparation.
- Designed and prototyped core experiences including OCR-based content capture, text-to-speech, pronunciation evaluation, dictionary lookup, flashcard saving, and mock test generation.
- Directed an external developer to scale and refine the product, translating product strategy into clear design specifications, interaction flows, and implementation priorities.
- Launched a lean web service, No Worry Tingxie, to test product-market fit, gather user feedback, and iterate quickly using behavioral insights from Google Analytics and Microsoft Clarity.

Autodesk

Two tenures across 2014–2018 and 2023–2024 — returned to lead a next-generation initiative

Principal Designer

Feb 2023 – Jun 2024

- Early core contributor to Autodesk's master API platform initiative, helping define the next-generation experience for product, version, and API management across multiple internal teams.
- Led design conversations across API, product, and engineering teams to align fragmented platform requirements into clearer user journeys and product direction.
- Conducted research and usability testing with IT managers, translating findings into personas, journey maps, and actionable design recommendations for Autodesk Access.
- Mentored designers, UX writers, and researchers, helping improve design quality, critique practices, and cross-functional collaboration

Senior UX Designer, Forge Platform

Nov 2014 – Jul 2018

- Owned UX design for Forge, Autodesk's cloud platform for exploring and purchasing 3D-related APIs, launched from scratch
- Shipped application management (create/edit/delete/view), developer learning content (docs, examples, tutorials), and monetization flows (homepage, pricing, subscription, usage)
- Work with vendors to give guidance for the Autodesk Developer Platform design

ViSenze — Design Manager

Mar 2021 – Jul 2022

- Led the design team for a B2B AI-powered product discovery platform, setting design direction across product strategy, UX/UI execution, and cross-functional delivery.
- Partnered with Sales, Marketing, Product, and Engineering to support the company's shift from sales-led to product-led growth through strategic workshops and product planning.
- Facilitated design sprint to identify customer pain points, clarify product opportunities, and support the company's shift from sales-led to product-led growth.
- Led UX/UI strategy for ViSenze Discovery Suite, a B2B AI-powered product discovery platform, balancing business goals, customer needs, and scalable product experience.

Singtel — Senior UX Designer

Jan 2020 – Dec 2020

- Designed loyalty and rewards experiences for My Singtel app and web, applying behavioral design, gamification, and customer engagement principles.
- Led UX design for Singtel OnePass, modernizing a legacy authentication experience into a more secure, intuitive, and scalable login journey across digital touchpoints.
- Collaborated with product, engineering, and business stakeholders to improve customer-facing digital journeys within a large enterprise environment.
- Mentored three junior designers, providing guidance on UX process, design quality, and stakeholder communication.

OCBC — Experience Designer

Jan 2014 – Oct 2014

- Developed foundational UX and design language guidelines for OCBC digital services, contributing to more consistent digital experiences across teams.
- Optimized the OCBC Wealth iPad app flow for relationship/account managers, improving the digital advisory experience for client-facing banking staff.
- Acted as the communication bridge between internal banking teams and external vendors to translate business requirements into usable, high-quality digital experiences.

Comcast Innovation Center — UX Designer

Dec 2011 – Jun 2013

- Led design and research for email, phone, and text communications within the Xfinity Connect app and mobile web
- Contributed to Xfinity TV app visual design and Whatson (second-screen remote control service) workflow and visual design

SIDE PROJECTS

UX Instructor (General Assembly)

- Taught UX 101 for Mobile User Experience

Workshop Facilitator (Singapore Tourism Board/A*star)

- Led workshops for STB and travel agencies to brainstorm ideas to rediscover Singapore
- Led design thinking workshops and short lectures for A*STAR, helping participants identify problems and generate ideas collaboratively.

EDUCATION
